

## **I. AMENDMENTS TO THE SPECIFICATION**

*Title:*

Dealuminized Catalyst Carrier, Method for ~~Producing Said Catalyst Carrier~~ of Production,  
and Method for Hydrating C<sub>2</sub> or C<sub>3</sub> Olefins With Water ~~in the Presence of a Catalyst~~  
~~Consisting of Said Acid Saturated Catalyst Carrier~~

*Please delete the abstract and replace it with:*

A catalyst support comprising silicates is described. This catalyst support has a lower aluminum content than naturally occurring sheet silicates and can be used in the hydration of C<sub>2</sub> and C<sub>3</sub> olefins to produce C<sub>2</sub> and C<sub>3</sub> alcohols. A method for the production of the catalyst support and a process for hydrating C<sub>2</sub> and C<sub>3</sub> olefins are also described. One advantage of this catalyst support is the reduction in aluminum leaching that occurs when this catalyst is used in the presence of phosphoric acid.

*Text of the Specification:*
